

## EARTH DISTURBANCE PLANNING

The Earth Disturbance Area includes every area of ground that will have the existing vegetation removed or covered during the life of the project. Earth Disturbance includes lawn, landscaping, rough grading, finish grading, septic fields, underground trenches for water lines, sewer lines and utilities, driveways and plantings. Carefully plan the project to avoid disturbing excess areas. Prepare a site plan with dimensions to determine the area in square feet of the areas that will be disturbed.

**DAMASCUS TOWNSHIP, WAYNE COUNTY, PA**

I certify that I will not disturb greater than one (1) acre during the life of my project. It is therefore understood that my project does not meet the requirements of a National Pollution Discharge Elimination System (**NPDES**) Permit for the discharge of stormwater during construction activities. If the scope and size of my project changes and the amount of earth disturbance is equal to or greater than one (1) acre I will contact the Wayne Conservation District for a determination of **NPDES** permit needs. By presenting this signed document and attached supporting documents I certify that I am responsible for any and all drawings, dimensions and calculations pertaining to earth disturbance of this property, and further certify that Damascus Township shall be held harmless for any earth disturbance that exceeds the declared area. I still further certify that I shall be completely responsible for any and all fees and penalties associated with this project should the scope of the project exceed the stated disturbance area.

I have attached a drawing showing all areas of earth disturbance with dimensions, and have attached an earth disturbance calculation sheet to this document.
