Re: NPDES permit determination (self certification)

I hereby certify that my project described below does not disturb one (1) acre or more during the life of my project. It is therefore understood that my project does not meet the requirements for a National Pollution Discharge Elimination System (NPDES) for Stormwater Discharges Associated with Construction Activities.

If the scope and size of my project changes and the amount of earth disturbance is equal to or greater than one (1) acre, I will contact the Wayne Conservation District for a determination of NPDES permit needs.

However, my project still requires a written Erosion and Sedimentation Control Plan be developed. This plan outlines how I am going to prevent sediment from leaving my site during construction. Items to consider in the plan are: Sequence of Construction, Temporary Measures (silt fence, mulch, etc.) and Permanent Measures (seeding and mulch with soil supplements, gravel coverage, etc.). This plan does not have to be reviewed by the Wayne Conservation District unless the municipality or another permit requires a review and approval.

This letter cannot be considered a waiver of any other federal, state or local permits.
