

Spotted Lanternfly Informational Session

Spotted Lanternfly / Dept of Ag, Flickr.com

Lycorma delicatula, commonly known as the Spotted Lanternfly (SLF), is a new invasive insect that has spread throughout southeastern Pennsylvania since its discovery in Berks County in 2014.

SLF presents a significant threat to Pennsylvania agriculture, including the grape, tree-fruit, hardwood and nursery industries, which collectively are worth nearly \$18 billion to the state's economy.

Join us for this free informational session on October 10, 2018 from 6:00 pm-7:30 pm as Emelie Swackhamer from Penn State presents:

- How to identify Spotted Lanternfly
- Impacts to local industry and communities
- Current quarantine area(s) in Pennsylvania
- Actions you can take to help stop the spread

Who should attend?

- Homeowners/Property Owners
- Township/Municipal Officials
- Business Owners
- Landscapers
- Agribusiness

Where:

Penn State Extension—Wayne County

648 Park Street, Suite E
